SCALE REDUCTION

Aries scale, taste, and odor reduction filters offer a propriety blend of a high capacity weak acid ion exchange resin and granular activated carbon. The ion exchange media prevents scale formation by removing the calcium and magnesium associated with alkalinity. The granular activated carbon (GAC) removes chlorine and enhances the quality and taste of the drinking water. The media is buffered to provide pH balance. Available in Quick Connect or 1/4" FNPT connectors in 5 and 10" lengths. Aries Inline filters cartridges are designed for low-flow, point-of-use filtration.
