## MAGNA CNS-C

STRONG ACID CATION

**NON-SOLVENT  
RESIDENTIAL SOFTENING  
COARSE MESH POLYSTYRENIC GEL  
SODIUM FORM**

ResinTech CNS-C is a coarse mesh, non-solvent, strong acid cation resin in sodium form. It is Black in color and made from standard cross-linked gel. CNS-C is Gold Seal Certified by the WQA for potable water applications.

### APPLICATIONS

- Softening - Residential
- High flow rate polishing - Residential

TYPICAL PROPERTIES & PHYSICAL CHARACTERISTICS	
<b>Polymer Matrix</b>	Styrenic Gel
<b>Ionic Form</b>	Sodium
<b>Fuctional Group</b>	Sulfonic Acid
<b>Physical Form</b>	Spherical Beads
<b>Particle Size</b>	16 to 45 US Mesh (297 - 1190 µm)
<b>% &lt; 50 mesh (300µm)</b>	< 1%
<b>Minimum Sphericity</b>	90%
<b>Uniformity Coefficient</b>	1.6
<b>Reversible Swelling</b>	Na to Ca -5% to -3%
<b>Temp Limit</b>	250°F (121°C)
<b>Capacity (meq/mL)</b>	1.8
<b>Moisture Retention</b>	40% to 52%
<b>Shipping Weight</b>	49 - 51 lbs/ft <sup>3</sup> (785 - 817 g/L)
<b>Color</b>	Black
<b>Regenerability</b>	Yes

### CERTIFICATIONS

WQA Gold Seal
